

Interchangeable tips / Puntali intercambiabili

Cylindrical shut off **G** ⑤

Recommended

Chiusura cilindrica **G**

Scelta consigliata

Conical shut off **N** ⑤

Suitable only for HDPE, LDPE, PP, PS

Chiusura conica **N**

Idoneo solo per HDPE, LDPE, PP, PS

- ⑧ **J G** : Thermocouple type (**JG grounded - JU insulated**) / Tipo termocoppia (**JG a massa - JU isolata**)

TYPE MG-3DSLÜ: The valve gate nozzle is suitable for moulding parts where an optimum gate aesthetics is required. It is also suitable for moulding materials with abrasive fillers. Unlike from the MG-3 nozzle type the sealing area of the nozzle seat can be easily machined on the cavity side. With respect to the MG-3D, the tip has been strengthened to allow the execution of larger sprues. With the respect to the MG-3DSLÄ nozzle, the tip is longer and can be shaped to follow the profile of the moulded part. The circular witness mark of the tip will remain on the moulded part.

TIPO MG-3DSLÜ: Ugello per l'iniezione con gruppo otturazione idoneo allo stampaggio di particolari dove è richiesto un ottimo aspetto estetico del punto di iniezione. E' idoneo anche allo stampaggio di materiali con cariche abrasive. A differenza dell'ugello MG-3 la lavorazione della matrice per la tenuta dell'ugello può essere eseguita dal lato cavità stampo. Rispetto all'ugello MG-3D il puntale è stato irrobustito per permettere l'esecuzione di materozze con dimensioni maggiori. Rispetto all'ugello MG-3DSLÄ ha una lunghezza maggiore del puntale che può essere sagomata per seguire il profilo del particolare stampato. Sul particolare stampato rimarrà il segno circolare del puntale.

TIP GROUP / GRUPPO PUNTALE

④ Type / Tipo	Code / Codice
MG-3DSLÜ	E19917

GATE AREA / SEDE UGELLO

The nozzle **MUST NOT** come in contact with the mould moving half.
 L'ugello in fase di esercizio non deve andare in battuta sull'acciaio della parte mobile dello stampo.
