TYPE 2: Nozzle suitable for injection on sprues or when the injection point vestige is not important. Not suitable for polymers that drool easily. If compared with F series nozzles, DN nozzles have the sealing area on the external body rather than the tip and requires less accurate machining of the seat.

TIPO 2: L'ugello DN-2 è idoneo allo stampaggio su materozza oppure direttamente in cavità lasciando un testimone marcato del punto di iniezione. A differenza degli ugelli serie F la tenuta dell'ugello è fatta sul corpo dell'ugello anziché sul puntale. L'ugello è idoneo allo stampaggio di materiali con cariche abrasive, non è idoneo allo stampaggio di materiali che tendono a colare.
